PROFESSIONAL SUMMARY

Entry-level Java Developer and 2026 B.E. Information Technology graduate with a strong foundation in Core Java (OOP, Collections, Multithreading, Java 8 Lambdas & Streams), RESTful APIs and MySQL. Experienced in building backend systems, writing unit and API tests (JUnit, Postman) and working in Agile teams with Git/GitHub. Strong DSA and problem-solving skills. Open to relocation.

TECHNICAL SKILLS

- **Languages:** Java , SQL, Python, JavaScript, C/C++, HTML5/CSS, React.js
- **Backend & APIs:** RESTful API design, HTTP methods, JSON, JDBC, Swagger, Postman, FastAPI, Node.js
- **Databases & Cloud:** MySQL, SQL, Relational DB Design, Oracle Cloud (OCI), Google Cloud, Docker (basics)
- **Tools & Practices:** Git/GitHub, Linux/Unix, Agile/Scrum, SDLC, CI/CD awareness, Unit & API Testing, Debugging

EXPERIENCE

Software Development & Security Intern — *Goa Shipyard Ltd.* Jul 2025 – Sep 2025

- Built an AI-powered Document Management Review System using Python and MySQL, implementing automated classification, retrieval and review workflows end to end.
- Developed and tested backend software in Linux environments, following secure coding and software development life cycle (SDLC) best practices.
- Researched and documented AI-based cloud antivirus solutions with practical recommendations.

Automated QA Intern — *Focus Bear (Remote)*

- Wrote and maintained automated test scripts and collaborated with a remote engineering team on test coverage, bug reporting and release quality.

UI/UX Intern — *Fluxatic Global* Jul 2025 – Sep 2025

- Partnered with developers in cross-functional Agile teams; ran usability tests and turned findings into engineering improvements.

Campus Networking Lead — *Google Developer Group (GDG) on Campus, PCCE* Aug 2025 – Present

- Lead campus developer initiatives and organise technical workshops by coordinating with speakers and engineers.

PROJECTS

Interview Preparation & AI Mock Coach — *Personal Project* 2025

- Designed and built a modular RESTful API backend (FastAPI) with reusable components and JSON request/response handling, following clean-code, DRY and OOP principles.
- Implemented event-driven, asynchronous flows for real-time transcription and dynamic feedback.
- Wrote automated API test scenarios with Postman and Python scripts to validate payloads, status codes and edge cases.
- Managed version control via Git/GitHub and delivered features in Agile sprints.

EDUCATION

B.E. Information Technology — *Padre Conceicao College of Engineering, Goa* 2022 – 2026
Coursework: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Software Engineering, Operating Systems, Computer Networks

Class XII (CBSE) — *Navy Children School, Goa* 2020 – 2022
